HAIR

Cuts & Styling

Our stylists are not only inspired by the latest cuts and styles, they're also experts when it comes to suggesting a look that compliments the shape of your face.

Color

There's more to hair coloring than meets the eye. Like picking a color that complements your skin tone. We'll also help you decide if it's best to color or highlight. And there are special considerations for coloring gray hair.

Perms

Want gorgeous, natural looking curls or wavy hair? Then you want to talk with our professional perm consultants. We can help determine if the condition of your hair makes you a good candidate for a perm, as well as advise you on how tight the curls should be.

Straightening/Smoothing

If you have naturally curly hair, you have two options for straightening it. One is a formula to relax the hair, or you can tame the curls temporarily. In either scenario, trust our professional stylist to straighten you hair and give you the look you want.

- Keratin Complex Smoothing Therapy by Coppola - Ever wish that your hair was more manageable, softer, straighter and had more shine? This treatment is the answer!
